ENGLISH

WOOD MOD. L1

Place the vaporizer on a solid, flat and stable surface. Plug in and push the button "POWER". Check that a propolis capsule is in place.

Lighting up of the ON/OFF led and a sound indicate that the vaporizer is now on and that the heating of the capsule has started.

The capsule is disposable and has a duration of about 122 hours.

A continuous flashing of the ON/OFF led together with a beep sound every 5 seconds indicate that the cycle of the capsule has come to an end. At this point in time, and the vaporizer ON, press the "POWER/RESET" button for about 10 seconds till the ON/OFF led stops flashing and remains firmly lit. Remove the spent capsule and place a fresh one to restart a cycle.

NB. Do not replace the capsule before the termination of the full cycle.

In order to obtain the best possible results in the prevention of respiratory ailments and for the full sanitation of secluded places, KONTAK recommends the use of the vaporizer 24hrs a day.

WOOD MOD. L2 WITH IONIZER

Place the vaporizer on a solid, flat and stable surface. Plug in and push the button "POWER". Check that a propolis capsule is in place.

Lighting up of the ON/OFF led and a sound indicate that the vaporizer is now on and that the heating of the capsule has started.

The capsule is disposable and has a duration of about 122 hours.

A continuous flashing of the ON/OFF led together with a beep sound every 5 seconds indicate that the cycle of the capsule has come to an end. At this point in time, and the vaporizer ON, press the "POWER/RESET" button for about 10 seconds till the ON/OFF led stops flashing and remains firmly lit. Remove the spent capsule and place a fresh one to restart a cycle.

The ionizer is activated when the vaporizer is plugged in, irrespective of the POWER button.

NB. Do not replace the capsule before the termination of the full cycle.

In order to obtain the best possible results in the prevention of respiratory ailments and for the full sanitation of secluded places, KONTAK recommends the use of the vaporizer 24hrs a day.

WOOD MOD. L3 WITH IONIZER AND FAN

Place the vaporizer on a solid, flat and stable surface. Plug in and push the button "POWER". Check that a propolis capsule is in place.

Lighting up of the ON/OFF led and a sound indicate that the vaporizer is now on and that the heating of the capsule has started.

The capsule is disposable and has a duration of about 122 hours.

A continuous flashing of the ON/OFF led together with a beep sound every 5 seconds indicate that the cycle of the capsule has come to an end. At this point in time, and the vaporizer ON, press the "POWER/RESET" button for about 10 seconds till the ON/OFF led stops flashing and remains firmly lit. Remove the spent capsule and place a fresh one to restart a cycle.

The fan mode may be activated by pressing for 5 seconds the "POWER" button while the vaporizer is "ON". Each time the vaporizer is switched OFF the fan mode is deactivated.

The ionizer is activated when the vaporizer is plugged in, irrespective of the POWER button.

NB. Do not replace the capsule before the termination of the full cycle.

In order to obtain the best possible results in the prevention of respiratory ailments and for the full sanitation of secluded places, KONTAK recommends the use of the vaporizer 24hrs a day.
